What is the DSI?

Quantifying experience and opinion
The Director Sentiment Index (DSI) represents the breadth of Australian Institute of Company Director (AICD) member opinions on a range of issues covering the Australian and global economies, government policy and governance regulations.

The DSI has tracked business and economic attitudes for the past 10 years, indicating shifts in business sentiment, and delivering robust and context-driven insights and trends.

DSI Survey Reports
This Insights Report includes a summary of analysis of key questions from the survey. A detailed report and database with full survey results is also available.

Update to Second Half 2021 DSI
The DSI was updated in the Second Half 2021 wave to better reflect current issues and to provide more precise and targeted insights.

The updated DSI provides greater focus on director perceptions of the health of local and international economies, the impact of government policy and support, and current business conditions. Less weight is now placed on business investment, labour demand, exports, wage growth, unemployment, outsourcing, profit, changes in ASX, the exchange rate, and inflation.

Despite all efforts having been made to ensure that results in the updated DSI are broadly comparable with previous waves, the changes in questions and the Index calculation methodology mean that the updated DSI is not directly comparable with previous waves.
The DSI survey was conducted online with a representative sample of 1645 respondents across Australia between 28 October - 8 November, 2021.

Respondents were AICD members with current directorships.

Sample profile information follows. Survey responses were weighted by gender to reflect the AICD member profile when analysing results.

1 See Appendix Report for analysis of results for all DSI survey questions
Australia sees robust growth expectations as lock downs abate and businesses get back to work
Confidence in the Australian economy is relatively high as 2021 winds up, with 58% of AICD directors believing the country is in a strong position—notably higher for the Australian economy than for overseas economies. Director perceptions of the strength of the economy of each Australian state varied considerably.

High vaccination rates and better-than-expected national finances in the aftermath of rolling lock downs suggest the Australian economy is returning to healthy growth.

The perspective on next year is more bullish, with two-thirds (67%) of directors confident the country’s 12-month economic outlook is strong, again notably higher than overseas economies.

Business sentiment optimistic for 2022
Hand-in-hand with the economy, business is recovering. Half of all directors (52%) see strong Australian business conditions currently. In 12-months time 64% believe business will be on sure footing, with positive indicators like investment, turnover and profits expected to grow.

Overall, directors more optimistic than pessimistic
The AICD Index is in positive territory with more director optimism than pessimism at a score of +17.9.

Finding and keeping good staff is a problem
Over half (55%) of directors face labour shortages and 63% were impacted by a difficult labour market. The trend looks to continue into the next 12 months—69% expect labour demands to increase and 41% think the skills shortage should be a government priority in the near term. Though lock downs and closed borders are gone, the hangover is likely to last well into 2022.

Climate change should be the Federal Government’s top priority
Responding to climate change should be Canberra’s most important priority over the next three years, according to almost half (48%) of all directors. This rises to 59% when considered over the next 10 to 20 years. Furthermore, 60% of directors support an emissions trading scheme for the Australian economy.

The Federal Government is expected to lead. Half of all directors (50%) believe climate change is a material risk to their organisation, but at the same time 49% see the uncertainty around climate change policy settings as a barrier to achieving climate governance at an organisational level.
Executive summary

Infrastructure investment should focus on renewables
Tying closely in with concerns over climate change, the top priority for public infrastructure investment should be in renewable energy sources, think 70% of directors—an overwhelming majority.

Interestingly, 28% believe infrastructure investment focus should be in nuclear energy, showing a broad desire for development of a diverse and low-carbon energy matrix in Australia.

In addition, over a third of directors (36%) think the government should invest in telecommunication networks, including internet infrastructure, indicating dissatisfaction in current connectivity capacity in Australia.

The post-pandemic office
It seems you can’t put the genie back in the bottle and flexible working arrangements will become a permanent fixture. While directors found this to have positive effects on staff retention (57%), wellbeing (53%), productivity (45%) and even attracting new talent (53%), there are concerns.

Over half (52%) believe having employees working from home leads to more complicated cyber security for their organisation.

Workplace vaccine mandates supported by three out of four directors
Sitting squarely within considerations around how and what the future of on-site work will look like, community health remains top of mind for a majority of directors (76%) who believe COVID-19 vaccines should be obligatory for all staff in their sector.

Skill sets need diversifying, with an eye on digital abilities
When it comes to diversity, the top concern for directors is skills. Almost three-quarters (73%) agree that their board needs to have more diverse skill sets. Within that, there’s a specific focus (59%) on digital capabilities.

Generally, 57% thought the current level of diversity on Australian boards is unsatisfactory, and half (51%) are seeking a greater balance of gender.

What keeps you up at night?
The big issue keeping executives from getting a good night’s rest is cyber security. Clearly a global issue of concern across the public and private sectors, 41% of directors said cyber crime and data security are front of mind in the small hours of the morning. At the same time, 86% are confident they understand the risks and opportunities presented by technology and 53% believe their board has enough oversight over cyber threats.

GLOBAL ECONOMIC OUTLOOK

Australia, Asia, US on the mend; EU remains unsteady

Australia

➔ Though pandemic uncertainty persists, a majority view the current Australian economy as buoyant, with 58% believing it’s in a strong position as 2021 wraps up.

➔ The 12-month outlook is even more confident, with two-thirds of directors (67%) seeing Australia return to robust economic health in 2022.

Internationally

➔ Perspectives on global economies are more circumspect. China and the United States are both seen as tentatively sound, while perspectives on Asia (excluding China) are ambivalent.

➔ However, only a quarter believe Europe is on solid ground, while a third think it’s in a weak economic position.

➔ Sentiment towards the United States and Asia (excluding China) is more positive for the next 12 months, but only 35% believe Europe will be in a strong economic position. Interestingly, China’s economy is not expected to change in the next 12 months, with outlook sentiment shifting only one point from its current rating, down to 46%.

Note: Changes to question or response options in second half 2021 may impact comparability with previous results

From 2021 2nd half Asia excludes China. Base: All respondents N= 1645
State by state, directors take contrasting perspectives

Key insights

→ Across Australia, directors have quite different perspectives on their state’s current and future economic health, with WA strongest and Victoria weakest currently. Though the impact of COVID-19 without doubt impacts sentiment, outlook diversity across states with similar pandemic experiences suggests more is at play.

→ Western Australians are the most optimistic, with eight out of 10 directors confident their state will do well economically in 2022.

→ This correlates with the fact 87% of directors in the mining industry and 83% of those in agriculture expect strong business conditions in the coming year*. Nonetheless, 30% of Queenslanders have a gloomy outlook for their state economy—the highest proportion in the country.

* Indicates low base <50

E8.2. Over the next 12 months, what would be your assessment of the health of the economy in the state where your primary directorship is based? Base: WA n=197, VIC n=411, QLD n=260

Please refer to accompanying Appendix Report for full results of business conditions by industry in next 12 months.
BUSINESS OUTLOOK

Business is expected to grow, but so are liabilities

Finding and keeping good employees is a key priority

➔ Most directors expect positive indicators like investment, turnover and profits to grow in 2022 as the Australian economy gets back to speed.

➔ At the same time, staff shortages, wage inflation and rising costs will likely be challenges in the coming year. These relate directly to the pandemic, which continues to affect skilled migration and global supply chains.

➔ The other business bugbear is Sino-Australian relations, which are not expected to improve in the near future.

#### Why do these issues keep you awake?

- "[We] need more leadership from the Federal Government on climate change and energy policy. They are backwards looking and influenced by major political donors that seek to benefit from coal and gas developments. Business needs a plan they can trust - at the moment they are going it alone or with guidance from some states (NSW and VIC)."
- "Directors liability is onerous in ASX companies"
- "COVID-19 has had impacts that are yet to flow though to our economies. The cost...of many of these will have inflationary impacts that will challenge our economies."
- "The transition from a period of record low interest rates, should it occur, will be very challenging for the Australian (and Global) economy and the industries in which we participate."
- "Increasing liability for directors means we become more risk averse and less likely to stretch."
- "An increase in focus on non-business outcomes by shareholders can impact the operations of the business severely."
- "Significant change and uncertainty in technology adaption and people skills required, as well as evolving the business model correctly and timeously, while economic conditions worsen."
- "Financial services is overregulated in Australia. It is constantly changing and requirements are impractical and place a huge burden on boards and management that adds little value."

Three-quarters of all directors support workplace vaccine mandates

The current AGM system is working well
- Agree: 50%
- Disagree: 13%

Our board has sufficient oversight of the culture of the organisation
- Agree: 74%
- Disagree: 12%

Business should make COVID-19 vaccines mandatory for staff in my sector
- Disagree: 12%
- Agree: 76%

DD1. How would you rate the impact of flexible working arrangements such as working remotely / from home in your organisation, in terms of...? Base: All respondents N=1645

TQ3. To what extent do you agree or disagree with the following statements...? Base: All respondents N=1645
TOPICAL ISSUES AND DEEP DIVES

Climate risk and climate governance

What are the barriers for your organisation relating to climate governance?

- Uncertainty around climate change policy settings: 49%
- Focus on short-term issues: 39%
- Uncertainty regarding cost / benefit of either action or inaction: 34%
- Lack of clarity on how to act: 31%
- Time and resources: 23%
- Impact to bottom line / return on investment: 19%
- Issue is beyond us: 15%
- Level of director understanding of climate science: 14%
- Climate change is not a pressing issue: 14%
- Effects of climate change are not relevant to my organisation: 14%
- Lack of director consensus on climate science: 5%

“Climate change is profound and underestimated.”

“Energy security is a key to economic stability and we face significant headwinds (linked to climate change).”

“Climate change is the most pressing issue of our times and the Federal Government refuse to address it despite the population pressing for action and global pressure to act.”

CLIMATE CHANGE IS A MATERIAL RISK FOR MY ORGANISATION

AGREE 50%
DISAGREE 27%

HOW SATISFIED ARE YOU WITH YOUR ORGANISATION’S RESPONSE TO CLIMATE GOVERNANCE?

SATISFIED 40%
DISSATISFIED 14%

DO YOU SUPPORT OR OPPOSE AN EMISSIONS TRADING SCHEME FOR THE AUSSIE ECONOMY?

SUPPORT 60%
OPPOSE 19%

TQ3.2. To what extent do you agree or disagree that climate change is a material risk for your organisation?
DD3. To what extent are you satisfied or dissatisfied with your organisation’s / Board’s response to climate governance, in terms of both risk and opportunity?
DD4. To what extent do you support or oppose an emissions trading scheme for the Australian economy?
Base: All respondents N=1645
Cyber security and technology risk

“Technology is rapidly changing the way business is done; Cyber crime can wipe out a business overnight.”

“Cyber security in particular is of concern. Whilst many layers of defence can be implemented, including education, control of employee actions at every level remains difficult and the ever increasing frequency of attacks at all levels of business leave us open to [further] attack.”

“It is impossible to keep totally up to date on cyber security.”

“Cyber crime can be an existential threat to the organisation.”

“Cybercrime is on the increase, is difficult to control for, and high impact. Combine that with mooted personal liability provisions for directors with regard to data and financial loss from cybercrime makes for a an unpleasant scenario.”

How would you rate the impact of flexible working arrangements in terms of cyber security?

- 52% NEGATIVE IMPACT
- 14% POSITIVE IMPACT

59% OF DIRECTORS AGREE THEIR BOARD IS SEEKING TO INCREASE DIVERSITY IN DIGITAL CAPABILITY AND TECHNOLOGY

How confident are you understanding the risks and opportunities presented by technology?

- 86% CONFIDENT
- 7% NOT CONFIDENT

DD1.8 How would you rate the impact of flexible working arrangements such as working remotely / from home in your organisation, in terms of cyber security?
G2.2 In your role as a director, how confident are you in understanding the risks and opportunities presented by technology?
BD2a.5 How much do you agree or disagree that your board is currently seeking to increase diversity in digital capability / technology?

Base: All respondents N=1645

TQ3.1 To what extent do you agree or disagree that our board has sufficient oversight of cyber security threats to our organisation? Base: All respondents N=1645
